1. Overview

The **HL Calendar** is a modern, Google Calendar-style extension for Joomla 6. It provides an intuitive user interface with drag & drop, color-coded categories, recurring events, and full frontend editing capabilities.

Key Features:

- Google Calendar-inspired design and usability
- 4 views: Month, Week, Day, List
- Drag & drop to move events and change their duration
- Recurring events (daily, weekly, monthly, yearly, custom)
- Color-coded categories with 16-color palette
- Full frontend editing (AJAX-based)
- Responsive design for all devices
- Joomla ACL permission system
- Fully localized in German and English
- Component + Module included in package

2. System Requirements

Requirement	Minimum
Joomla	6.x
PHP	8.0 or higher
MySQL	5.7+ (UTF-8 MB4)
Browser	Modern browser with JavaScript (Chrome, Firefox, Safari, Edge)

Note: FullCalendar.js 6.1.11 is automatically loaded via CDN (jsDelivr). An internet connection is required for the frontend display.

3. Installation

3.1 Install Package

1. Download **pkg_jwcalendar_v1.7.2.zip**.
2. Log in to the Joomla administration area.
3. Navigate to **System > Install > Extensions**.
4. Select the ZIP file and click **Upload & Install**.
5. The system will automatically create database tables and 5 default categories.

3.2 Create Menu Item

1. Go to **Menus > [Your Menu] > New Menu Item**.
2. Select type: **HL Calendar > Calendar**.
3. Enter a title (e.g., "Calendar").
4. Save the menu item.

3.3 Set Up Module (Optional)

The package also includes a calendar module that you can place in any module position:

1. Navigate to **Content > Site Modules**.
2. Click **New** and select **HL Calendar**.
3. Configure position, view, and category filter.
4. Publish and save the module.

4. Configuration

Configuration is found under **Components > HL Calendar > Options**.

4.1 Color Settings

HL Calendar offers 9 customizable colors that control the entire appearance:

Setting	Default	Description
Primary Color	#1a73e8	Main color for buttons and highlights
Primary Color (Hover)	#1765cc	Darker variant for hover effects
Today Highlight	#fff8e1	Background color for today's date
Background Color	#ffffff	Calendar background
Text Color	#3c4043	Main text color
Text Color (Light)	#70757a	Secondary text color
Border Color	#dadce0	Dividers and borders
Hover Background	#f1f3f4	Background on mouse hover
Sidebar Background	#ffffff	Sidebar background

4.2 Calendar Settings

Setting	Options	Default
Default View	Month / Week / Day / List	Month
First Day of Week	Sunday / Monday	Monday
Show Week Numbers	Yes / No	Yes
Show Sidebar	Yes / No	Yes
Business Hours Start	Time (HH:MM)	08:00
Business Hours End	Time (HH:MM)	18:00
Default Event Color	Color picker	#3788d8

5. Calendar Views

5.x Month View (Default)

Displays the entire month as a grid. All-day events appear as colored bars, timed events are shown with their time. Click on a date to create a new event.

5.x Week View

Shows 7 days with a time grid (hourly resolution). All-day events appear in the top bar. Business hours are highlighted. Ideal for detailed weekly planning.

5.x Day View

Shows a single day with hourly resolution. Perfect for days with many events to see the exact schedule.

5.x List View

Shows all events chronologically as a text list. Especially useful for print views and a quick overview of upcoming events.

Tip: Switch between views using the buttons in the top right corner of the calendar. Use the arrow buttons to navigate forward and backward.

6. Managing Events

6.1 Create Event

There are two ways to create a new event:

- Click the + button in the sidebar
- Click directly on a date or time slot in the calendar

Event Form:

Field	Required	Description
Title	Yes	Name of the event
Start	Yes	Start date and time
End	No	End date and time
All Day	No	Toggle for all-day events (hides time fields)
Category	No	Category assignment (determines color)
Location	No	Event location
Description	No	Detailed description (with text formatting)
Color	No	Individual event color (16-color palette)
Recurrence	No	Recurrence settings (see Chapter 7)

6.2 Edit Event

Click on an event to open the detail popup. Then click **Edit** to open the event form and make changes.

6.3 Delete Event

Click on an event and then **Delete**. A confirmation dialog will appear. Only the creator or users with delete permissions can delete events.

6.4 Drag & Drop

Events can be moved via drag & drop. Drag an event to a new date or time. In week and day views, you can also change the duration by dragging the bottom edge of the event.

7. Recurring Events

HL Calendar supports recurring events in Google Calendar style. Recurrence options are dynamically generated based on the start date.

7.1 Recurrence Types

Option	Example	Description
Does not repeat	-	Single event (default)
Daily	Every day	Only available for single-day events
Weekly on [day]	Weekly on Wednesday	Based on the weekday of the start date
Monthly on the [Nth] [day]	Monthly on the 3rd Tuesday	Smart Nth weekday calculation
Yearly on [date]	Yearly on March 18	Based on the start date
Custom...	Every 2 weeks	Free interval and unit selection

7.2 Custom Recurrence

When selecting **Custom**, additional fields appear:

- **Every [X]** - Interval (1-30)
- **Unit** - Days, Weeks, Months, or Years

Note: For multi-day events, the "Days" unit is not available. Daily recurrence is only possible for single-day events.

7.3 Recurrence End

For recurring events, you can specify when the series should end:

- **Never** - The series runs 10 years into the future (practically "infinite")
- **On [date]** - The series ends on a specific date

8. Categories

8.1 Default Categories

5 default categories are created during installation:

Category	Color	Color Code
General	Blue	#3788d8
Work	Red	#e67c73
Personal	Green	#33b679
Family	Yellow	#f6bf26
Holidays	Purple	#8e24aa

8.2 Manage Categories (Super User Only)

Super Users can manage categories directly in the frontend:

- **New Category:** Click the + next to "My Calendars" in the sidebar
- **Edit:** Hover over a category and click the pencil icon
- **Delete:** Hover over a category and click the trash icon

When deleting a category, associated events are not deleted but only unassigned from the category.

8.3 Toggle Visibility

In the sidebar under "My Calendars", you can toggle the visibility of each category using checkboxes. This allows you to show only specific event types.

9. Permissions

HL Calendar uses the standard Joomla ACL system for access control.

User Role	Rights
Guest (not logged in)	Can only view public events. No editing possible.
Registered User	Can create, edit, and delete own events.
Super User	Full access: Manage all events and categories, change options.

9.1 Configure Permissions

Under **Components > HL Calendar > Options > Permissions** you can configure the following rights per user group:

- **core.admin** - Access component administration
- **core.options** - Change options
- **core.manage** - Access component
- **core.create** - Create new events
- **core.delete** - Delete any event
- **core.edit** - Edit any event
- **core.edit.state** - Publish/unpublish events
- **core.edit.own** - Edit own events

10. Module Configuration

The HL Calendar module can be placed in any template position. It supports multiple instances with different settings.

Parameter	Options	Description
Default View	Month/Week/Day/List	Which view is shown on load
Show Sidebar	Yes / No	Show/hide mini calendar and categories
Frontend Editing	Yes / No	Allow creating/editing events in the module
Calendar Height	CSS value (e.g., 600px)	Height of the module
Week Numbers	Yes / No	Show ISO week numbers
First Day of Week	Sunday / Monday	Week start day
Category Filter	Multi-select	Show only specific categories

Tip: Use the category filter to set up one module for "Work" events only and another for "Family" events only.

11. Update Server

HL Calendar supports automatic update notifications through the Joomla update mechanism.

When a new version is available, it will be shown in the Joomla administration area under **System > Update > Extensions**.

Update Server URL:

```
www.eiwtestzone.ch/huberlabs-extensions/updates/jwcalendar_update.xml
```

Updates can be installed directly from the Joomla backend without manually downloading the extension.

12. FAQ / Troubleshooting

Q: The calendar is not displayed

A: Make sure JavaScript is enabled in the browser and there is an internet connection (FullCalendar.js is loaded via CDN). Check the browser console for error messages.

Q: I cannot create events

A: Check if you are logged in and the **core.create** permission is enabled for your user group (Components > HL Calendar > Options > Permissions).

Q: Categories are not shown in the sidebar

A: Make sure the sidebar is enabled in the options and at least one category has "Published" status.

Q: Recurring events are not displayed

A: Check the recurrence end date. If "Never" is selected, events are generated up to 10 years into the future. With "On [date]", no events are shown after that date.

Q: Drag & drop does not work

A: Drag & drop is only available for logged-in users with editing permissions. Guest users can only view events.

Q: The module shows different events than the component

A: Check the category filter in the module settings. If specific categories are selected, only events from those categories are displayed.

Q: Colors are not displayed correctly

A: Clear the browser cache. Color settings are loaded as CSS Custom Properties and may be cached.
